**Subject:** I believe that many people are forgetting about what the products & services of Microsoft have done

I believe that many people are forgetting about what the products & services of Microsoft have done for the country and the world. Microsoft has made it much easier for all of us to lead our lives and communicate with one another because of their business and residential software services. (why do you think the U.S. is such an advanced nation) The founding of Microsoft certainly did not hurt this evolution. Please remember....everyone loves an American success story!!!  
Just like Wal-Mart.
